# Task 1

Write a R program to read two matrices of *n×m* and *p×q* order and find

a).  add, b). subtract, c). multiplication and d). division of the matrices

## Task 2

Write a R program to implement task1 using functions

Note: Implement a separate function for each individual operation

## Task 3

Write a R program to implement a function to find sum of squares of first N numbers.

Input: 3

1^2 + 2^2 + 3^2

Output:= 14
